Its official - there is a public meeting coming up for San Jacinto - we should update the slides from the last meeting with recent work (south impoundment; cap porewater sampling, recent inspection) and considering the new guidelines, and plan the two pre-presentations, etc. Phil - lets discuss updates to the color coding part based on comments received at the last meeting, new dioxin levels, anything else, etc. Valmichael - do you have the pics from the recent inspection? Donn, do you have any info on the test results referred to below? - is it sediment data? fish? - can we get anything from Texans Together?

Thanks,

Gary Miller, P.E. (inactive)

Gary, here's the Plan for the meeting. Looks like June 14th in Highlands. I called them to inform that you would be the presenter for the site discussion. I confirmed that you are the RPM, etc. I'll be there to help facilitate. That this is their local meeting.....not an EPA meeting. They will announce it, etc.

Let me know.. thanks.

Hello!

I hope everyone is doing well. It has been awhile since we have had a meeting! So - the next meeting is Thursday, June 14th at 7:00 at the Methodist Church in Highlands! We will meet in the larger Fellowship Hall. Donn Walters from the EPA will be meeting with us to share some updated information. Michael Ruger from the Texans Together will be bringing THE TEST RESULTS that we had done on the river!!! The LONG awaited results!!!! at last! :) We hope to have some news-type people there and perhaps a few other key people. This looks to be a very promising, profitable meeting - so don't miss it! Bring your friends, neighbors and family. If you have any questions, please e-mail me. See you on June 14th!!!

Sarah Davis
